

## Indiana Association of School Principals

### 2021 Legislative Priorities

- IASP supports policies and practices that promote the recruitment of and placement of school leaders reflective of the diversity found in our schools and communities.
- IASP supports funding ALL students in public schools at 100% regardless of whether the instruction is being delivered virtually, or in person, by certified staff.
- IASP supports funding to provide reliable broadband technology to all areas throughout the state to eliminate inequity and allow ALL students access to electronic devices and connectivity regardless of location or socio-economic status.
- IASP supports school accountability that provides multiple measures (K-12) and DOES NOT include post-graduation metrics.
- IASP supports the use of assessments to measure student performance, and these should be viewed as one tool among many to show academic progress when measuring school improvement. Specifically, student growth from year to year should be factored into an accountability system to present a clear picture of how schools are supporting students.
