

## Indiana Association of School Principals

### 2024 Legislative Priorities

- IASP supports the increased funding and policies that promote student and staff well-being and that help address the behavioral health of our students and staff members.
- IASP supports the redesign of the high school diploma to include flexibility for schools to provide students with the most relevant educational experiences and alternative options to help prepare them for their post-secondary experience.
- IASP recognizes the teacher shortage and supports the funding of policies and procedures that will help schools with the recruitment and retention of highly qualified teaching candidates that reflect our classrooms.
- IASP appreciates past efforts and future collaborative efforts to provide regulatory relief for schools that allow them more time to focus on best practices in regard to curriculum, instruction, and assessment.
- IASP supports programs that help students improve early literacy benchmarks. We encourage any changes to be based on recent research and best practice.
- IASP recognizes the impact that chronic absenteeism has had on the performance of our students. IASP supports legislation that will ensure students and parents are held accountable when the educational needs of the child are not being met due to chronic absences.
